Natal, Rio Grande do Norte, Brazil

*alchemist.software@proton.me*

## Summary

---

Hi, I'm Guilherme, a self-taught brazilian programmer with a passion for learning. I have developed my personal interest in tech and software since early 2022, and have been steadily growing myself as a developer ever since. I'm deeply in love with this field and want keep moving forward and improving myself as much as I can.

## Hard Skills

---

### Programming Languages

HTML/CSS, JavaScript, TypeScript, NodeJS

### Operating System

Linux (Debian, Ubuntu), Bash scripting

### Software Engineering

Git (CLI), Github (PRs, Issues, Projects), Atlassian (Bitbucket, Jira)

### Spoken Languages

American English (Advanced), Brazillian Portuguese (Native)

## Professional Experience

---

November 2022 - November 2023

**Junior Developer, Cactus Systems** – Natal, Rio Grande do Norte

Worked as a trainee and junior Back-end Web Developer building a company internal tool. Comprised of a micro-service oriented, AWS Lambda, NodeJS and Typescript based tech stack, running an internal Dashboard application for analysing advertisement performance metrics. Gained important and effective communication skills in this position, being the primary actor for most of the time I worked in the project.
